

Ableton Live template Installation & description

Dear user,

This folder contains the Spark MIDI Controller template designed for optimal use with Ableton Live.

Here are the steps to fully appreciate this integration feature:

STEP	DESCRIPTION	SCREENSHOT
1	Finder > Applications > Arturia > Spark MIDI Control Center	
2	Menu File > Open	
3	Select the "factory.smc" file (located in this archive)	
4	Action > Send to Spark Controller	
5	Once the file has been transferred, quit Spark MIDI Control Center	
6	Double-click the "Live_template.als" file This action launches the Ableton Live sequencer, and displays 8 Audio tracks.	

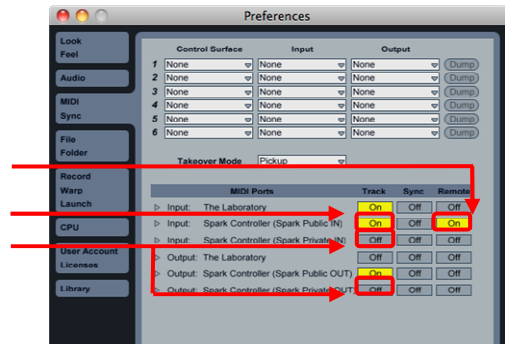

Go to menu Live > Preferences > MIDI,
and check:

7

Spark **Public IN Remote** is **ON**

Spark **Public IN Track** is **ON**

Spark **Private ports** are all **OFF**

On **the next page**, you will find a scheme showing the relation between the Spark hardware controller and the various Ableton Live sequencer elements.

You can now beat the future with Arturia Spark and Ableton Live...

The Arturia team.
